

# HOSPITAL NAME HERE

is pleased to introduce

## PATIENT INFORMATION AT YOUR FINGERTIPS!

Photon, your new communication system that enables access to patient data via real-time push notification anytime, anywhere, using a smartphone, tablet or computer while providing the ability to securely share and communicate on this information over a simple consult.

All PACs images, reports, labs, vital signs, clinician-generated photos and text - the entire relevant patient chart - is encapsulated in the consult thread.

- HIPAA-compliant, patient-centric mobile communication platform for live data access
- Continuously retrieves the complete relevant patient record from the hospital's HIS
- Enables providers to securely collaborate via an asynchronous consult allowing more accurate clinical decisions
- Notifies all appropriate providers when patient data updates are available

**Schedule your 15-minute training for one of the following days:**

**8:00 am - 5:00 pm in the Hospital Physician Lounge**

**Tuesday, Month Date**  
**Wednesday, Month Date**  
**Thursday, Month Date**
