

Photon Medical Communications

Patient Import File Format

Date	Rev	Author	Approved By	Changes
2015-08-18	0	J.Miglietta		initial doc
2015-08-27	1	J.Miglietta		Updates to reflect actual implementation
2016-02-18	2	J.Miglietta		Adds istest field to allow testing a file before actual import.

Doc Control No: PMC-16-2015-08-18-002

Fields That can be Imported

LastName	FirstName	DOB	Last4SSN	UserEmail
				(of PCP)

File Format

Option 1 (Comma delimited)

LastName, FirstName, DOB, Last4SSN, UserEmail, isTest

Option 2 (Pipe delimited)

LastName | FirstName | DOB | Last4SSN | UserEmail | isTest

Import Details

- A PCP having an Email corresponding to patient record must exist as a user within photon, prior to importing the patient list.
- Order of data fields is not restricted, however, the first line of the import file **must** list the field names in the same order the data is stored. e.g. UserEmail | FirstName | LastName | DOB | Last4SSN
- Field names are case **insensitive**
- Any additional data columns are ignored

Note the Sample file PatientImportListForTest.csv includes extra fields that appear in the import patient screen but are ignored when actually processed. Only the fields listed above are tested for validity and processed.
